

Thanatorn Thammasakorn

Full-Stack Developer & Co-Founder(SaaS)

Tel: 098-2651433 | Email: peet.thanatorn@gmail.com | Pathum Thani, Thailand

PROFILE SUMMARY

Full-Stack Developer & Co-Founder(SaaS) with experience spanning both corporate work and building SaaS products from the ground up (0-to-1) — covering problem analysis, solution design, system development, and direct sales/customer management. Proven track record with real users and recurring revenue.

TECHNICAL SKILLS

Frontend : React.js, Next.js, Bootstrap, RESTful API Integration
Backend: Node.js, Prisma, Sequelize, MongoDB, MySQL, PostgreSQL
Infrastructure & DevOps: Vercel, Render, Cloudflare (Tunnel/Auth)
Payment & Integration: Stripe (Payment Gateway), Telegram API (System Notifications)
Other: System Architecture Design, Database Design (ERD), API Design & Specification

WORK EXPERIENCE / PROJECTS

Co-Founder & Full-Stack Developer — PromptChex (Jul 2026 – Present)

- Built an HR and Payroll SaaS for Thai SMEs.
- Technical Stack: Backend — MongoDB, Prisma, Node.js, Stripe (third-party payment), Telegram API (system notifications) / Frontend — Next.js, Bootstrap, API Integration
- Designed the system to calculate Thai labor law compliance (social security, withholding tax, daily wages, overtime) in a single click.
- Designed and built LINE OA/LIFF integration as the primary employee-facing channel, replacing fingerprint scanners, with GPS location verification against a configurable check-in radius.
- Designed the database schema, along with Data Dictionary and API Specification documentation.
- Designed features to solve real-world problems: an approval workflow to prevent time-in/time-out fraud, and bulk payroll calculation for 10+ employees in a single click.
- Planned marketing strategy and sold directly to customers B2B, including negotiation.

Co-Founder & Full-Stack Developer — Hiveseat (hiveseat.co) (Jan 2026 – Present)

- Designed and built an Event Seat Management platform that helps users cut guest seating management time from hours to minutes.
- Technical Stack: Backend — MySQL, Sequelize, Node.js, Stripe (third-party payment), Telegram API (system notifications) / Frontend — Next.js, Bootstrap, API Integration
- Reached 700+ active users with recurring monthly revenue.
- Designed UX/UI around a "understandable within 5 minutes" usability principle.
- Designed the payment flow with third-party integration for automated payment collection.
- Set pricing structure based on customers' willingness to pay.
- Continuously iterated the product based on real user feedback to fit market needs.
- Owned everything from marketing strategy to system development.

WORK EXPERIENCE / PROJECTS

Fullstack Developer — TechStellar (Nov 2023 – Aug 2025)

Primarily a Frontend Developer role, responsible for converting UI designs into code using React.js and Next.js, along with API integration to connect with backend services.

- JIB Computer (E-commerce website) — Converted UX/UI team designs into functional web pages using Next.js; integrated APIs with backend systems to fetch and display product/order data.
- Koala March Thailand (LINE Application) — Converted designs into code for a LINE Application; integrated APIs with the backend; built a QR code scanning system for snack boxes to verify authenticity and record scan data to the database.
- Changan — Full-stack responsibility: fixed and improved frontend, integrated APIs, and handled backend responses for display and further processing on the frontend.
- HealthUp — Converted UI designs into a web application using React.js.

KEY COMPETENCIES (END-TO-END PRODUCT OWNERSHIP)

- Problem Definition & Solution Design: Analyzing business problems and designing solutions that fit market needs.
- System & Database Design: Designing database structures and APIs built to scale.
- UX/UI Design: Designing user experiences that are easy to use and tailored to the target audience.
- Pricing Strategy: Designing pricing structures appropriate to the market and customer segment.
- Product Roadmap Planning: Planning and prioritizing feature development.
- Sales & Negotiation: Direct B2B sales and negotiation with customers.

EDUCATION

- Bachelor's Degree, Faculty of Economics Kasetsart University
